THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

May 26, 1992

The Honorable Thomas S. Foley
Speaker of the House of
Representatives
Washington, DC 20515

Dear Mr. Speaker:

It is with pleasure that I submit to you the Tenth Annual Report of Accomplishments Under the Airport Improvement Program as required by Section 521 of the Airport and Airway Improvement Act of 1982.

A report has also been sent to the President of the Senate.

Sincerely,

A handwritten signature in cursive script, reading 'Andrew H. Card, Jr.', is positioned above the printed name.

Andrew H. Card, Jr.

Enclosure

THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

May 26, 1992

The Honorable Dan Quayle
President of the Senate
Washington, DC 20510

Dear Mr. President:

It is with pleasure that I submit to you the Tenth Annual Report of Accomplishments Under the Airport Improvement Program as required by Section 521 of the Airport and Airway Improvement Act of 1982.

A report has also been sent to the Speaker of the House of Representatives.

Sincerely,

A handwritten signature in cursive script, reading 'Andrew H. Card, Jr.', is positioned above the printed name.

Andrew H. Card, Jr.

Enclosure

FOREWORD

This annual report of the Airport Improvement Program (AIP) for the fiscal year ending September 30, 1991, is the tenth report of activity under authority granted by the Airport and Airway Improvement Act of 1982, as amended.

In fiscal year 1991, new AIP grants and amendments to previous grants totaled \$1,835.7 million. The 1,404 new grants amounted to \$1,670.3 million and were issued for use to the types of airports, integrated airport system planning, and State block programs, as follows:

<u>Airport Type</u>	<u>Grants</u>	<u>Amount</u>
Primary Airports	577	\$1,106.7M
Smaller Commercial Airports	77	46.0M
Reliever Airports	199	207.4M
Other General Aviation Airports	479	252.1M
Integrated Airport System Planning	69	9.3M
State Block Grant Pilot Program	3	48.8M

During the ten years of the AIP, 11,285 grants have been issued totaling \$10.9 billion. Charts I and II show, by airport category, the number of grants issued and funds provided, respectively. Chart III shows the kinds of airport development and associated AIP funds.

The Airport Improvement Program is authorized through fiscal year 1992. However, on November 5, 1990, the Aviation Safety and Capacity Expansion Act of 1990 was enacted and amended some provisions of the AIP. The primary changes were the authorization of \$1.9 billion for fiscal year 1992, the establishment of a set-aside of discretionary funds for a Military Airport Program, and a Passenger Facility Charge (PFC) Program to provide a source of additional capital funding for expansion of the national air transportation system.

TENTH ANNUAL REPORT OF ACCOMPLISHMENTS UNDER THE
AIRPORT IMPROVEMENT PROGRAM

Section 521 of the Airport and Airway Improvement Act of 1982, as amended, requires that the Secretary of Transportation submit an annual report to Congress describing the accomplishments of the airport grant program. This report covers activities for the fiscal year ending September 30, 1991.

BACKGROUND

The Federal Government initiated a grants-in-aid program shortly after the end of World War II to promote the development of a system of airports to meet the Nation's needs. This early program, the Federal-aid Airport Program (FAAP), was established with the passage of the Federal Airport Act of 1946 and drew its funding from the general fund of the Treasury.

A more comprehensive program was established with the passage of the Airport and Airway Development Act of 1970. This Act provided for grant assistance for airport planning under the Planning Grant Program (PGP) and for airport development under the Airport Development Aid Program (ADAP). The source of funds for these programs was a new Airport and Airway Trust Fund, into which were deposited revenues from several aviation user taxes on such items as airline fares, air freight, and aviation gasoline. The Act, after several amendments and a one-year extension, expired on September 30, 1981.

The successor grant program, known as the Airport Improvement Program (AIP), was created by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248). It provided assistance under a single program for airport planning and development through funding from the Airport and Airway Trust Fund. The 1982 Act also contained a provision to make funds available for noise compatibility planning and to carry out noise compatibility programs as authorized by the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193).

The Airport and Airway Improvement Act has been amended several times. For instance, the Continuing Appropriations Act (Public Law 97-276, October 2, 1982) added a section providing authority to issue discretionary grants in lieu of unused apportioned funds under certain circumstances and the Surface Transportation Assistance Act (Public Law 97-424, January 6, 1983) increased the annual authorizations for the AIP for fiscal years 1983-1985.

A 1987 amendment, the Airport and Airway Safety and Capacity Expansion Act of 1987 (Public Law 100-233), extended the authority for the AIP for five years. It authorized \$1.7 billion each fiscal year through 1990 and \$1.8 billion each year for

fiscal years 1991 and 1992. This amendment also authorized a new procedure in which a sponsor is advised of Federal intentions to fund long-term high priority capacity projects as appropriations allow and to reimburse sponsors for certain specified work performed before a grant is received. This procedure is implemented through a Letter of Intent issued to sponsors. Other provisions of the 1987 amendment authorized a three-State Block Grant Pilot Program during fiscal years 1990 and 1991 and established a requirement that 10 percent of the funds made available under the AIP be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals, known as the Disadvantaged Business Enterprise Program.

The Aviation Safety and Capacity Expansion Act of 1990 (Public Law 101-508) authorized a Passenger Facility Charge (PFC) Program to provide funds to finance airport-related projects that preserve or enhance safety, capacity, or security, reduce noise from an airport that is part of such system, or furnish opportunities for enhanced competition between or among air carriers by local imposition of a charge per enplaned passenger. This Act also established a Military Airport Program for current and former military airfields which will help improve the capacity of the national transportation system by enhancement of airport and air traffic control systems in major metropolitan areas. Further, the Act extended the State Block Grant Pilot Program through fiscal year 1992. It also changed the authorization for fiscal year 1992 to \$1.9 billion.

The Airport and Airway Improvement Act also requires the Secretary of Transportation to publish a report on the status of the National Plan of Integrated Airport Systems (NPIAS). The NPIAS emphasizes system planning and development to meet current and future needs; it includes development considered necessary to provide a safe, efficient, and integrated airport system meeting the needs of civil aviation, national defense, and the postal service. An airport must be included in this plan in order to be eligible to receive a grant under the AIP. The latest edition of the NPIAS covering 1990-1999 was transmitted to the Congress on March 4, 1991. The current plan includes a total of 3,692 airports: 396 primary, 172 commercial service, 285 reliever, 2,432 general aviation, and 407 new airports.

Chart IV depicts the various functions legislated by the three major grant program authorization Acts since 1946: FAAP, ADAP, and AIP.

POLICY

In formulating the Airport and Airway Improvement Act, the Congress included a "Declaration of Policy" section which sets forth the following statements of policy:

- The safe operation of the airport and airway system will continue to be the highest aviation priority.
- The continuation of airport and airway improvement programs and more effective management and utilization of the Nation's airports are required to meet the current and projected growth of aviation and the requirements of interstate commerce, the postal service, and the national defense.
- The Act should be administered in a manner to provide adequate navigation aids and airport facilities, including reliever airports and reliever heliports, for points where scheduled commercial air service is provided.
- The Act should be administered in a manner consistent with a comprehensive airspace system plan to maximize the use of safety facilities with highest priority for commercial service airports. The goal is to install, operate, and maintain: a precision approach system, a vertical visual guidance system, and a full approach light system for each primary runway; grooving or friction treatment of all primary and secondary runways; a nonprecision instrument approach for all secondary runways; runway end identifier lights on all runways that do not have an approach light system; electronic or visual vertical guidance on all runways; distance-to-go signs for each primary and secondary runway; a surface movement radar system at each Category III airport; a taxiway lighting and sign system; runway edge lighting and marking; and radar approach coverage for all airport terminal areas. (Note: The Facilities and Equipment Appropriation provides funding for items meeting published establishment criteria that are not included in airport development grants.)
- The Act should be administered in a manner consistent with the Federal Aviation Act of 1958 with due regard for the goals expressed therein of fostering competition, preventing unfair competition in air transportation, maintaining essential air transportation, and preventing unjust and discriminatory practices.
- Special emphasis should be given to reliever airports and their development.
- Development of cargo hub airports should be facilitated because of their critical role in the movement of commerce through the airport and airway system.
- Aviation facilities should be constructed and operated with due regard to minimizing current and projected noise impacts on nearby communities.
- The Federal administrative requirements placed upon airport sponsors can be reduced and simplified through the use of a single project application to cover all airport improvement projects to be undertaken in a particular year.

- It is in the national interest to develop in metropolitan areas an integrated system of airports designed to provide expeditious access and maximum safety.

- Airport construction and improvement projects which increase the capacity of facilities to accommodate passenger and cargo traffic, thereby increasing safety and efficiency and reducing delays, should be undertaken to the maximum feasible extent.

- It is in the national interest to ensure that nonaviation usage of navigable airspace be accommodated but not allowed to decrease the safety and capacity of the airspace and airport system.

- Artificial restrictions on airport capacity are not in the public interest and should not be imposed to alleviate air traffic delays unless other reasonably available and less burdensome alternatives have first been attempted.

AIRPORT IMPROVEMENT PROGRAM

The Airport and Airway Improvement Act of 1982 authorized the Secretary of Transportation to make grants for airport planning and development under the Airport Improvement Program.

Annual Authorization

Authorization levels as of the end of fiscal year 1991 for the program are as follows:

<u>Fiscal Year</u>	<u>Authorization Levels</u>
1982	\$ 450,000,000
1983*	800,000,000
1984*	993,500,000
1985*	987,000,000
1986	1,017,000,000
1987**	1,017,200,000
1988**	1,700,000,000
1989**	1,700,000,000
1990	1,700,000,000
1991**	1,800,000,000
1992	<u>1,900,000,000</u>

Total \$14,064,700,000

* The annual authorizations included \$200 million for each of the fiscal years 1983 and 1984 and \$75 million for fiscal year 1985 as authorized in the Surface Transportation Assistance Act (STAA).

** Rescissions in contract authority which reduce the amounts shown include \$148 million in fiscal year 1987, \$12 million in fiscal year 1988, \$100 million in fiscal year 1989, and \$200 million in fiscal year 1991.

Airport Categories

The airport funding categories consist of commercial service, primary, cargo, reliever, and general aviation airports and are defined as follows:

- A commercial service airport is a public airport which enplanes 2,500 or more passengers annually and receives scheduled passenger service.
- A primary airport is a commercial service airport which enplanes more than 10,000 passengers annually.
- A cargo service airport is an airport which is served by aircraft providing air transportation of property only (including mail) with an aggregate aircraft landed weight in excess of 100 million pounds.
- A reliever airport is one that has been designated as having the function of relieving congestion at a large commercial service airport and providing alternative general aviation access to the overall community.
- General aviation airports, although not specifically defined in the 1982 Act, comprise the largest single group of airports in the United States airport system; these are the airports that remain after exclusion of the commercial service and primary airport categories.
- The statutory definition of an airport is any area of land or water used for landing and takeoff of aircraft and includes, within the above five categories of airports, special types of facilities such as seaplane bases and heliports.

Distribution of Funds

Not more than 49.5 percent of the annual amount authorized to be obligated may be provided as entitlement to primary and cargo service airports. These funds were apportioned in fiscal year 1991 as follows:

Primary Airports

- \$7.80 for each of the first 50,000 enplaned passengers
- \$5.20 for each of the next 50,000 enplaned passengers
- \$2.60 for each of the next 400,000 enplaned passengers
- \$0.65 for each passenger in excess of 500,000 enplaned passengers

In fiscal year 1991, no primary airport received less than \$300,000 or more than \$16,000,000.

Cargo Service Airports

For fiscal year 1991, 84 airports qualified as cargo service airports. No cargo service airport can lawfully receive more than 8 percent of the total amount of money available for cargo service airports. This money remains available for the sponsor's use for the fiscal year in which it is authorized and the two fiscal years immediately following.

States/Insular Areas

A total of 12 percent of the annual authorization was apportioned for use within the States and insular areas. The eligible general aviation and reliever airports within the 50 States, the District of Columbia, and Puerto Rico qualified for 99 percent of the 12 percent annual authorization while airports in the insular areas (Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands) qualified for the remaining 1 percent. Funds apportioned to the States and insular areas remain available for the fiscal year in which authorized and the two fiscal years immediately following.

Alaska

Alaskan airports received at least the amount they were apportioned in fiscal year 1980 under previous grants legislation. This totaled an additional \$10.5 million in fiscal year 1991.

Discretionary Funds

The remaining funds are defined as discretionary, but a sizable portion of these is used to achieve specified funding minimums. A minimum of 10 percent of all funds is for reliever airports, 2.5 percent is for nonprimary commercial service airports, 10 percent is reserved for planning and implementing noise compatibility programs under the Aviation Safety and Noise Abatement Act of 1979, 0.5 percent is for the preparation of integrated airport system plans, and 1.5 percent is for the Military Airport Program. Of the remaining discretionary funds, 75 percent is to be used for preserving and enhancing capacity, safety, and security and carrying out noise compatibility planning and programs at primary and reliever airports. The remaining 25 percent is to be used for any eligible project at any airport.

Rate of Participation

With certain exceptions, the Federal share at all airports is 90 percent of the total allowable project cost. At primary airports which annually enplane 0.25 percent or more of the total number of passengers enplaned at all commercial service airports (1,213,272 or more enplanements for fiscal year 1991), the Federal share is 75 percent. In addition, there are upward

adjustments for projects in States containing high percentages of public lands. Grants for integrated airport system planning are funded at a 90-percent level. Projects to implement noise compatibility projects, as authorized by the Aviation Safety and Noise Abatement Act, are funded at an 80-percent level at the largest airports and at the same rate as other development projects at the remaining airports. For eligible areas of terminal buildings at commercial service airports, the Federal share may not exceed 75 percent.

Environmental Considerations

The Federal Aviation Administration (FAA) considers and weighs environmental factors, as well as safety and economics, when evaluating proposed Federal actions related to airports. The FAA airports program procedures identify types of actions which require an environmental assessment and consultation process. This process provides the FAA, other agencies, and members of the public with an understanding of the potential environmental impacts of a proposed action. Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) requires an environmental impact statement when an action would produce a significant impact on the environment; otherwise, a finding of no significant impact may be prepared. Other laws have particular requirements relative to specialized concerns such as air quality, water quality, public recreational lands, historic and archeological sites, endangered species, coastal zones, wetlands, floodplains, and noise.

Initial review of proposed Federal airport actions identifies the extent of environmental analysis and coordination required. If an action is not in a category requiring environmental assessment and does not have the potential, either individually or through cumulative effects, of significantly affecting the environment, it is categorically excluded from environmental processing. As experience was gained in the environmental field, FAA procedures categorically excluded more types of development projects from environmental processing. The FAA's most recent airport environmental procedures have been in existence since 1985 and have proven to be reliable, detailed guidance for assessing airport development projects. In addition, FAA provides ongoing supplemental guidance to its field counterparts as revised regulations are issued by other Federal agencies. These include recent regulatory actions related to stormwater management, wetlands, and air quality, for example.

The FAA's assistance to airport sponsors in identifying environmental requirements varies with the scope and nature of the proposed Federal actions. For the new Denver International Airport to replace Stapleton International, the FAA established an environmental review team to ensure timely review and

completion of environmental documentation. The FAA has since that time established review teams for environmental analyses at other locations. This team approach is highly successful and will continue.

Noise Compatibility

Federal Aviation Regulations (FAR) Part 150, Airport Noise Compatibility Planning, was issued in January 1985 to implement portions of the Aviation Safety and Noise Abatement Act of 1979. Through fiscal year 1991, FAA has funded the preparation of over 200 noise compatibility studies; has made determinations that 145 Noise Exposure Maps were prepared in compliance with FAR Part 150; and has approved 104 Noise Compatibility Programs (NCP), including two revisions to one previously approved NCP and revised maps at five locations. In fiscal year 1991 alone, FAA completed actions on 23 Noise Exposure Maps and 22 NCP's. The FAA is funding the implementation of recommendations included in approved NCP's through the Airport Improvement Program. In addition, airports may fund eligible measures to mitigate noise impacts through collected passenger facility charges.

Civil Rights Requirements

In connection with the acceptance of Federal assistance under the Airport Improvement Program, an airport sponsor is required to satisfy certain civil rights requirements. During fiscal year 1991, FAA regional Civil Rights staffs completed one application review and one post-award review for compliance with Title VI of the Civil Rights Act of 1964.

Civil Rights staffs approved 966 Disadvantaged Business Enterprise (DBE) Programs and annual updates required by regulations of the Office of the Secretary of Transportation under 49 CFR Part 23. Twenty-three reviews were made of sponsors following program approval, 19 of which included an onsite visit. All compliance issues resulting from the reviews were resolved informally.

During fiscal year 1991, nine complaints were filed under the DBE regulations, two were filed under Section 504 of the Rehabilitation Act of 1973, three were filed under Title VI, and two Section 30 complaints were received. Section 30 refers to a provision of the Airport and Airway Development Act which was retained in its entirety as Section 520 of the Airport and Airway Improvement Act.

Passenger Facility Charge Program

The Passenger Facility Charge (PFC) Program, authorized by the Aviation Safety and Capacity Expansion Act of 1990, will provide a source of additional capital funding for expansion of the national air transportation system.

This program requires that the AIP funds apportioned to a large or medium hub airport be reduced if a PFC is imposed at that airport. This reduction will take place in the fiscal year following the approval of authority of PFC collections at that airport and continue in each succeeding fiscal year in which the PFC is imposed. The apportionment will be reduced by 50 percent of the forecast PFC revenue, but not to exceed 50 percent of the earned apportionments for that fiscal year. Such reductions will begin to occur in fiscal year 1993 since PFC approvals will begin in fiscal year 1992.

These foregone apportionments are distributed within the AIP program as follows:

- a) 25 percent to the AIP discretionary fund; and
- b) 75 percent to the "Small Airport Fund."

Of the 25 percent distributed to the discretionary fund, half of the amount (one-eighth of the total) must be spent at small hub airports.

Of the 75 percent distributed to the "Small Airport Fund," one-third (one quarter of the total) will be distributed to general aviation (including reliever) airports. The remaining two-thirds (one half of the total) will be distributed to nonhub commercial service airports.

State Block Grant Pilot Program

The State Block Grant Pilot Program, authorized by the 1987 and 1990 amendments to the Airport and Airway Improvement Act, has been implemented by Part 156 of the Federal Aviation Regulations. Under this regulation, three States assumed responsibility for administration of AIP grants at other than primary airports. In fiscal year 1989, FAA selected the States of Illinois, Missouri, and North Carolina from the States invited to participate in this pilot program.

These three States administered funding of nonprimary commercial service, reliever, and general aviation airports for fiscal years 1990 and 1991 and will continue in 1992. Each State is responsible for determining which locations will receive funds within the State and for ongoing project administration. A total of \$48.8 million was granted in fiscal year 1991: \$24.9 million to the State of Illinois, \$14.0 million to the State of Missouri, and \$9.9 million to the State of North Carolina.

Military Airport Program

The Military Airport Program was authorized under Section 9109 of the Aviation Safety and Capacity Expansion Act of 1990 and requires the Secretary to designate up to eight current or former military airports which can improve the capacity of the national air transportation system. The Act also specifies that no less than 1.5 percent of available AIP funds be set aside for the designated airports.

A total of \$27 million of discretionary funds was available and obligated in fiscal year 1991 at these airports. The FAA designated seven current and former military airfields. The locations and amounts granted to these airports were: \$5.0 million each to Stewart International Airport, Newburgh, New York; Scott Air Force Base, Belleville, Illinois; and Ellington Field, Houston, Texas; \$2.7 million to Manchester Municipal Airport, Manchester, New Hampshire; \$2.8 million to Myrtle Beach Air Force Base, Myrtle Beach, South Carolina; \$2.1 million to Albuquerque International Airport, Albuquerque, New Mexico; and \$4.4 million to Guam International Airport, Agana, Guam.

All of these airports will help improve the capacity of the national air transportation system by enhancing airport and air traffic control system capacity in these major metropolitan areas as well as by reducing current and projected flight delays. The projects approved for these airports included planning; land acquisition; security; runway, apron, and taxiway construction and improvements; lighting; terminal development; and navigational aids.

The airports designated shall remain eligible to participate in the program for five fiscal years following their designation except that an airport which does not attain a level of enplaned passengers during a five-fiscal-year period, which qualifies it as a small hub airport or a reliever airport, may be redesignated for additional fiscal years.

Major Capacity Project Grants

During fiscal year 1991, \$308.0 million of discretionary funds were obligated for capacity projects. This included support for runways, taxiways, and terminal complex expansions at many airports. Among these were grants to construct new runways at Detroit Metropolitan and Palm Springs Regional Airports and to continue the development of the new Denver Airport and the phased development of major construction work started in the last fiscal year. Over \$58.3 million in discretionary funds are included for installing and/or improving airport security systems.

In conjunction with several of these major projects, eight airport sponsors received Letters of Intent (LOI) for these airports: Orlando International, Standiford Field, New Orleans International, Greater Buffalo International, Toledo Express, Nashville International, Washington Dulles International, and

Washington National. Under an LOI, the sponsor may proceed with a project and receive reimbursement in future years as funds become available. By the end of fiscal year 1991, there were 16 outstanding LOI's.

Fiscal Year 1991 Planning and Development Activity

In fiscal year 1991, gross AIP obligations amounted to \$1,835.7 million, of which \$1,670.3 million was for 1,404 new grant agreements and \$165.4 million for increases in existing grant agreements. Funds recovered from adjustments to prior year projects were also available.

The new grants included 577 for a total of \$1,106.7 million for primary airports; 77 for \$46.0 million for other commercial service airports; 199 for \$207.4 million for reliever airports; 479 for \$252.1 million for general aviation airports; 69 for \$9.3 million for integrated airport system planning; and \$48.8 million for the three State block grants.

Included in these grant agreements (1,404 for \$1,670.3 million) was \$207.2 million for 80 grants to achieve noise compatibility. This amount included \$122.7 million for the purchase of noise-impacted land adjacent to airports, \$55.7 million for soundproofing residences and schools, and \$28.9 million for other efforts to reduce noise.

Nine locations received grants totaling over \$19 million to start construction of or to acquire land for new or replacement airports. These locations are North Whale Pass and St. George, Alaska; Chinle, Arizona; Thomaston, Georgia; Georgetown and Jamestown, Kentucky; Claremore, Oklahoma; Dallas (Heliport) and Hillsboro, Texas.

Charts V and VI on the following pages show the fiscal year 1991 and prior years' authorization and appropriation limitations. Listings of fiscal year 1991 funding by State and location are shown in Tables I and II, respectively.

CHART VI

AIRPORT IMPROVEMENT PROGRAM

AUTHORIZED BY THE AIRPORT AND AIRWAY IMPROVEMENT ACT OF 1982, AS AMENDED
GRANT FUNDING AUTHORIZATIONS, APPROPRIATION LIMITATIONS, AND OBLIGATIONS
(Dollars in millions)

FISCAL YEAR	APPROPRIATIONS ACT			NEW GRANT TOTAL	NUMBERS OF NEW PROJECTS	
	AUTHORIZATIONS 1/ LIMITATIONS 2/	GROSS OBLIGATIONS 3/	5/			
1982	\$ 450.0	\$ 450.0	\$ 412.5	4/	\$ 412.5	651
1983	\$ 800.0	\$ 804.5	\$ 805.8		\$ 736.0	1082
1984	\$ 993.5	\$ 800.0	\$ 811.5		\$ 739.2	1104
1985	\$ 987.0	\$ 925.0	\$ 934.7		\$ 848.7	1160
1986	\$1017.0	\$ 885.2	\$ 906.1		\$ 782.0	1083
1987	\$1017.2	\$1025.0	\$1053.0		\$ 919.4	1173
1988	\$1700.0	\$1268.7	\$1289.8		\$1278.3	1251
1989	\$1700.0	\$1400.0	\$1430.4		\$1279.3	1258
1990	\$1700.0	\$1425.0	\$1453.1		\$1284.5	1152
1991	\$1800.0	\$1800.0	\$1835.7		\$1670.3	1404

1/ Authorizations column. Increases of \$200.0 million each in FY 1983 and 1984 and \$75.0 million in FY 1985, authorized by the Surface Transportation Assistance Act of 1982 (STAA) (Public Law 97-424).

- 2/ Appropriations Act column. FY 1983 includes basic authorization of \$600.0 million and \$150.0 million of the \$200.0 million authorized by the STAA and appropriated under the Emergency Jobs Bill (Public Law 98-8) and \$54.5 million of unrequested entitlements carried over from prior years; FY 1984 includes basic authorization of \$793.5 million and \$6.5 million authorized under the STAA; FY 1986 authorization of \$925.0 million was reduced to \$885.2 million as a result of P.L. 99-177, Balanced Budget and Emergency Deficit Control Act; FY 1987 includes basic authorization of \$1,000.0 million and \$25.0 million supplemental appropriation, P.L. 100-71, July 1987.
- 3/ Gross obligation column. Gross obligations include current year funds plus reobligations of funds recovered from adjustments to prior year projects. Difference between yearly gross obligations and new grants are increases to existing agreements.
- 4/ Includes Airport Development Aid Program (ADAP) entitlements that were authorized to be continued under the Airport Improvement Program (AIP). FY 1982 data do not include an FY 1982 grant to Reno, Nevada (Cannon International), for \$5.1 million funded with FY 1982 monies authorized prior to approval of the AIP.
- 5/ ADAP reobligations. Not included in above figures are reobligated funds recovered from adjustments to obligations made under the ADAP program authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount. For each fiscal year from 1982 through 1991, the reobligations have been \$7.1, \$6.7, \$7.1, \$5.2, \$4.0, \$6.7, \$2.7, \$3.1, \$1.1, and \$4 million, respectively.
